Screenshot halaman edit product pada bagian manage product

The screenshot displays the phpMyAdmin web interface in a browser. The address bar indicates the URL: `localhost/phpmyadmin/index.php?route=/sql&server=18&db=db_burger&table=user&pos=0`. The interface shows the 'user' table within the 'db_burger' database. The table structure is visible, showing columns: id, username, email, password. The table contains 8 rows of data. The 'Options' tab is selected, showing the table structure and data. The 'Query results operations' section is visible at the bottom.

The screenshot shows a web browser window with the phpMyAdmin interface. The browser's address bar displays the URL: `localhost/phpmyadmin/index.php?route=sql&server=1&db=db_burger&table=products&pos=0`. The phpMyAdmin interface is for the 'db_burger' database, specifically showing the 'products' table. The table structure is defined as `SELECT * FROM `products``. The table contains four rows of data:

id	name	price	image
4	Burger SOK	80	carousel 3.png
6	Burger Paket	60	carousel 1.png
8	Burger Keju	10	burger2.png
9	Burger Mewah	60	burger6.png

The interface also shows options for query results operations, including 'Print', 'Copy to clipboard', 'Export', 'Display chart', and 'Create view'. A 'Bookmark this SQL query' dialog is visible at the bottom, with a label field and a checkbox for 'Let every user access this bookmark'.
